Subject: Problem with renegade.
Posted by Drkpwn3r on Thu, 10 Jun 2004 02:04:56 GMT

objects.ddb will do that sometimes, I don't use the file but I've read alot about how leaving objects.ddb in a folder will disallow the viewing on the advanced listings. :rolleyes:
See if he has it, if so, have him delete it & then try
If not, no clue what the problem is right off. If it isn't there, see if a reinstall of Renegade will work for him, it usually fixes that for me
