Greetings,

   Me and my pals over at DriReign.net have ran into a bit of a problem. Our hosting has been cut off, leaving us with nowhere to post updates on projects! This has come at a very, very bad time, seeing as how we are about to launch Renegade: Sole Survivor, but with no website to download, or get support from! If anyone has the kindness in their heart to donate 100 MB (mostly for the mod download), to us, to let us put up DriReign.net once again, and allow Sole Survivor to have more support, please, contact me on AIM(kidrage11) or reply in this thread! Any help is greatly appreciated!
