BASIC CHARACTER MODEL TUTORIAL:
http://renhelp.co.uk/?tut=47

For the first tutorial I almost have done is a tutotrial on making a very basic character model.

Second I have planned is low poly head modelling.

Then if that is finished i'll do other misc tutorials on anything i know that isn't already done.

If you wish to see these from me post support .

The first model I have made just for the tutorial. 10.2 minutes to model (with taknig screens).
