Before you get a new video card, you should upgrade your power supply to 350 watts atleast. I don't know anything about the Radeon 9700, nor the manufacture Power Color. I suggest either buying the Radeon 9800 Pro, or the Radeon 9600XT. If you're not too much into ATI, the Geforce FX 5900 is at the same price as the Radeon 9700 you found there, and I would also suggest getting that instead.

Here's what I found for you:

Cheap Radeon 9600XT 256MB -

Radeon 9800 Pro, most likely over your budget by $20 -

Geforce FX 5900 deal -

Those are the cards I extremely suggest.
