Subject: Any Star Wars Galaxies Players Out There?
Posted by bigejoe14 on Thu, 24 Jun 2004 23:06:14 GMT

I downloaded th 14 day trial and I'm having some performance problems and I would like to see if I could get some help to fix them.

Whenever I'm in a city in SWG my performance drops down to about 75% of what it was. Whenever I'm out and about away from any city, performance is perfect. The odd part is that this only happens when I start moving around. If I stand still everything runs like normal. But whenever I start moving again within the city it drops in performance almost immediately.

I've tried turning the settings all the way up and all the way down but it dosen't do anything. I've doen everything I can graphically to try and get this to run better but I just can't figure it out. Note that this only happens when I am inside a city. This does not happen to me when I am away from a city.

My system:
Windows XP Pro
ATI Radeon 9800 Pro (4.4 Catalyst Drivers)
512MB DDR RAM
AMD Athlon XP 3200 Barton Core
KT600 Dragon Ultra Motherboard Platinum (Drivers are up to date)
