This map is more of one which you can just do what ever you feel like on it.

There is places to snipe, a paintball arena, a stonehenge area, plus a massive water dam, which flows off into another pool which has lots of terrain to explore and do stunts from.

The textures, are all custom, ranging from different games etc... It has a really old feel to it, and looks pretty good, other then the fact, i still need to scale down the ground textures more..

Here is 4 pictures of it, at its stage right now. Its 75% complete, all i need to do, is fix a couple textures , then do the level edit, which wont take more then 1 day.

The last one, is inside the torture hole at the colloseum.

The area itself, where the seats are located has projectile blockers, so people fighting cannot get hit by spectators.. Has vehicle blockers surrounding it to..

Well thats it, i hope you like it lol..

If you have any ideas, feel free to tell me
