macPhoenix5pmac sucks

Take that back..

You should convince Crimson to finish/start the approvement tool and form a w3d approvement team.

Personally, I can't be bothered to receive dozens of mails a day and verifying each one of them - Sorry. There is so much I can do, and this is not one of them. I'm a coder, not a w3d files verifier.

LOL, How did you get stuck with that job?
