I looked at the faq and i saw this and it might help me solve my problem

How do I get RenGuard to work with All-Seeing Eye?

In order for ASE to work properly with RenGuard, you must do the following:

Open Up ASE

Goto Filter->Configure Games

Expand Installed Games (click on + button)

Change renegade.exe to game.exe in the Program Location Text Box.

Click OK.

Now, the game should launch properly from there.

(Thanks to Dante for this fix!)

Also... You need to set your name in ASE by going to F2 -> Options -> Renegade -> Name.
