Sorry if this was posted somewhere else but I looked through the first 4 pages on the forums and found nothing also did a search which came up with nothing here is my problem I installed LFDS for RedHat 8.0 and LFDS Wrapper for 8.0 Im running on RedHat 8.0 so it works fine but when i try to run brenbot i get Can't connect to LFDS Wrapper! and it keeps saying that until i shut it down can you tell me what im doing wrong?

Starting up renrem thread...
BRenBot 1.35 linux.
brenbot is Copyright 2003-2004 by Blackhand Studios. All Rights reserved.
Connecting to RenGuard...
Could not load ssc_ignore.txt - No users are being ignored by RenGuard!
Got serverlist..
Sending to ... 66.79.176.170:100
Opening server port ...
IRC Initialization...joining 68.158.244.9:6667
my nick is IAserv04
Setting up protected nickname thread...
Setting irc refresh thread...
Can't connect to LFDS Wrapper!
Connected to RenGuard.
Connecting to IRC... waiting for welcome message
Got Server Welcome Message...
Identifying with NickServ...
Joining IRC Channel...
Connection to renrem not possible. Can't send msg BlazeRegulator/BlazeRenBot 1.35 linux starting up...
Connection to renrem not possible. Can't send game_info
Connection to renrem not possible. Can't send player_info
IRC: IAserv04 :+wx

You need to add ssc_ignore.txt yourself, pico ssc_ignore.txt (add playername)

When you start ./renegade_server it will give you a port number, listen os port nr blabla or something.

Add that port number in your setup.ini file
RemoteAdminPort = 4853 for exampel
RemoteAdminIP = 10.3.31.18 (Whatever)

Then goto the brenbot.cfg file:
BotMode = LFDS

#--Remote Admin Settings------------------------------------------------------------
# The next 3 lines should be the same info that is in your server.ini
# Note: Although it says "Linux" its the same for Win32

RenRemLinuxHost = 127.0.0.1 (as before, whatever)
RenRemLinuxPort = 4853 (exampel)
RenRemLinuxPassword = XXXXXXX

This should solve your problem.
