Greetings,

Me and my pals over at DriReign.net have ran into a bit of a problem. Our hosting has been cut off, leaving us with nowhere to post updates on projects! This has come at a very, very bad time, seeing as how we are about to launch Renegade: Sole Survivor, but with no website to download, or get support from! If anyone has the kindness in their heart to donate 100 MB (mostly for the mod download), to us, to let us put up DriReign.net once again, and allow Sole Survivor to have more support, please, contact me on AIM(kidrage11) or reply in this thread! Any help is greatly appreciated!

Wow, that's an obvious scam. There's no such thing as "Unlimited bandwidth" or "Unlimited web storage."

Quote:When a website is found to be monopolising the resources available onedollarhost.net reserves the right to suspend that site immediately. This policy is only implemented in extreme circumstances and is intended to prevent the misuse of our servers. Customers may be offered an option whereby onedollarhost.net continues hosting the website for an additional fee.

If you go above around about 1GB of storage your site is generally suspended.

CrimsonTalk to me...

Will do.

Xp, your the backup, but the dedicated server would still be nice .

No, and since the release is so soon, and many aspects of the always.dat were modified, it would be pointless to compile another one just for testers, one will ship with the mod.

xptekWow, that's an obvious scam. There's no such thing as "Unlimited bandwith" or "Unlimited web storage."

Actually there is. If you set up your own webserver, and have a large harddrive or few on it, then you do have unlimited web storage, all you have to do is get more hard drives, or larger ones. And then about the bandwidth all you need is a very good connection.

No, the backbone provider will complain if you use excessive bandwith. There's still no "unlimited" storage any way you'd like to look at it.

xptekNo, the backbone provider will complain if you use excessive bandwith. There's still no "unlimited" storage any way you'd like to look at it.

Or it's just set so high that they don't think that you will ever reach it.

If you go above around about 1GB of storage your site is generally suspended.

BUT there's UNMETERED... (sidenote: I also do believe that it is scam, plus the site is slow, that's a bad thing.)

xptekNo, the backbone provider will complain if you use excessive bandwidth.

I Uploaded about 12 gigabytes of stuff in May, and that's with a very slow upload, if I could upload alot faster then I currently can I would probably upload much more information since people would not cancel the downloads after they found out it would take them a while to download the file(s)
