Somebody on my team today used a bug I didn't know, we were same team and he started shooting my mrls with his mrls. FF was off, but he was killing my mrls... ( played on Renguard server where Mac go every day, the one of STUTU clan. )

How can we stop such retarded noobs using bugs ?

he told me he was using poke hack... 'tard !

I have also that kind of bugs since we have blue box on the game...  
Don't know if blue box are a renguard feature...

Poke Hack = BS

Im fairly certian he was using an exploit that under certain circumstances can be done with the mrls and mobile artillery. I won't say more so as not to give people a reason to "try it", except that it is not a hack, and its nothing RenGuard can stop nor that BHS can easily fix without getting the

source code to the game engine.

Enough evidence was provided to prove you guilty as a cheator. I will discuss this with my advisors and eventually have you banned from Renegade. So called "cheators" don't last long and I'm sure you have learned a lesson.

Teamkilling without FF on is a glitch yes, u often see it used killing people repairing ref, u can use any tank but some of them are more effective so its not a hack  
last time when i was playing on gamespy i had cheaters on my team, it got me pissed cuz i hate cheaters so there was one with a sakura in gdi base, so i teamkilled him and then he was like WTF and then left the game lol

Sorry senor renardin

You haven't improved that much if you bump posts that are this old. :s

Locked.
