You guys are making it so the Renguard patch system comes with new maps right?

Well can you make it so it comes with RenAlert?

Then after rengaurd is patched there could be an extra option on the Rengaurd start page for Renalert.

Just an idea....

Aircraftkiller said in the RenAlert forums that RenGuard was going to be included in the next patch, so there is no way someone could cheat in RenAlert.

Yes but then there would be no need for the second renalert icon on the desktop.

Instead it could combine both icons making it more convient and it would defenetly add more people to renalert
