**Subject: negotioating port fails on hosted games.. please help**
Posted by darkexo on Thu, 01 Jul 2004 16:55:58 GMT

hi, whenever i try to join a hosted game on renegade it says negotiating port with server, and then after about a minute it says firewall port negotiation failed, or it says port negotiation timed out.
this is a bit of a problem when i try to play clan wars for obvious reasons. it is fine when i try to join a dedicated server, and i think it is probably my router. if anyone has any ideas atall please help, thanks in advance

darkexoi think it is probably my router.

You are probably correct it probably is your router.

Read the god dam topic titled:
IMPORTANT: "Negotiating port..." error SUGESTIONS!

After that read:
--Tips for posting in this forums PLZ READ--

I can see how you missed them they are only the first two topics in the dam Forum.

Ok, im off to my "Happy Place" now.
