I was really bored.. and there is alot of dumbass mods out there. So I wrote up this

There are about 4 cheats that are out right now, a few of them are almost undetectable.

_____
Final Renegade - This cheat is one of the most popular cheats. Most people know about it and what it does.

Effects:
Blows tanks up and kills every enemy character with one click of mouse with about any character.
Heals instantly with repair gun.
Mammoth tanks shoot incredibly fast, 100 missiles in about 3 seconds.
Tests:
There is really no need for a test if you spot someone doing this...
_____
Big Head cheat
Effects:
Increases almost all characters heads to the size of a med tank. Makes it incredibly easy to get headshots.
Tests:
Ask for them to outline your head in bullets with a pistol.
Have them take a screen shot of the character that you suspect they have the big head cheat on.

_____
Right Click/ Repair Hack
Effects:
Right click with a pistol heals REALLY fast, a few right clicks with pistol will heal a mammy to full health.
When holding down left mouse button shoots like a machingun without reloading ammo. (They can single click to make it less obvious)
Right clicking with certain units/vehicles will do double damage or more. (Left clicking does the normal damage)
Tests:
There is really only one way to test, you need to get a screen shot of there pistol ammo at anything besides 12.

_____
Kamikaze
Effects:
Left/right click with pistol kills your character in one shot.
Right click with pistol kill any vehicle in one shot, left click does ALOT of damage, but not as much as right clicking.
Left click with engineer gun heals instantly.
Right click with engineer gun kills characters/tanks instantly.
Tests:
Ask them to shoot you with a pistol just once.

Ask them to heal a damaged character on your team.
-On this cheat, it won't bring there points up when the destroy tanks.. so the person with the least amount of points could be
the one cheating.

_____
Bones
Effects:
This file makes it so you can edit the body parts of characters so that they do more damage. (Like if I wanted to put it so I shoot you
in the foot it will count as a headshot)
Tests:
Ask the player to shoot you in different body parts, anything but the head does 10 damage. The head does 50 damage when shot at.

_____
Stealth Hack
Effects:
Makes stealth characters/vehicles visible to you.
Tests:
Ask them for a screen shot of a stealth vehicle or stealth character. (Some people may have stealth skins, making them
more visible when they are up close)

_____

I wrote this because one mod in particular was in mIRC, and we told him his this guy was repairing vehicles instantly but he insisted
asking for a screen shot and kept asking "how many kills does he have". Just remember the person doesn't have to have 40 kills and 0 deaths
to be a cheater.

spoonyratThanks for the info. Still in a clan with Joe and Boom? I really don't think I need to

elaborate, do I :rolleyes:

No problem. I'm not in a clan with Joe or Boom right now. Boom hasn't been on in a while and Joe won't get on Renegade   . So I'm playing for D_Z0ne.. not much better I guess   I want a new clan
