Use a sqlite gui and open the brenbot .dat file. Its in your brenbot folder. If you have seen sql, then its quite simple. Hopefully you should be able to do it. Its not hard.

You need to:

- Download SQLite Manager
 - close BRenBot so that it is not running while you edit
 - make a BACKUP COPY of brenbot.dat
 - open brenbot.dat with SQLite Manager
 - At the top-left select "Users" from the Dropdown menu
 - Click on "Query" at the top right.
 - A list of Registered Usernames should now appear in the main window.
- Select the names you want to delete and click on Remove button.
- Close SQLite Manager and restart BRenBot.

The nicks should now no longer require authentication.
