Just cause he doesn't have a free photo editor is no reason to call him names Scamp...

Glyde I use Paint Shop Pro and love it like a Michael Moore loves food. It 0wns.

z310 if u mean pirate it, i don't do that. i don't like renguard, but since people keep accusing me of cheating :C (I've only played this game a month, I haven't even learned how to use the planes for a week or so) and i like rules... but if you go back and remeber something and read my School Trouble post u'll probably disagree

and i hate trials, they bug me and then after 30 days they want me to pay, then i have to delete the reg key to re-inatll it (i think)... to much work

lol Yes I knew Gimp was a software program. That Jasc is a 60 day trial. Even though it says 30, after 30 it says your trial has expired and you will only be able to use this for 30 more days. If you don't want to buy it, you can just set your date back to like 1940 when you need to use it. It's not very smart... lol

If you don't want to buy it, you can just set your date back to like 1940 when you need to use it. It's not very smart... lol

Version 6 or something like that (forget which version exactly) has a 60 day trial, after that it goes "You are on day 100 of your 60 day free trial" etc.

Photoshop is one of those programs that I would pirate. There's no way in hell I'm going to pay $600 for a photo editing program.

GIMP has a pretty steep learning curve as I understand it, somewhere between 3ds max and the

---

secrets of teh universe as I recall. I can't learn MAX either, the UI has no logical layout, it's just a bunch of buttons thown out on a screen.

PSP is only a hundred bucks at most places, version 8 is easily as good as PS.
