I have been hearing it on the LTROUSH CTF server. I think i heard about it on NoN00bs servers too...

people that tell you there are none obviously don't know, and if there were/are, either the hackers themselves won't tell anyone (of course, wouldn't you?) or people that know about them'll private message/e-mail someone on the rg team so they can patch it up quietly without letting anyone know either.

I'd say the answer is really yes and no

dodmadcatI have been hearing it on the LTROUSH CTF server. I think i heard about it on NoN00bs servers too...

I have been on the LTRoush CTF server damn near everyday, and haven't heard anything of the sort once. Haven't heard it anywhere else either.

So if you've been hearing it. It's not from a creditible source, and isn't worth listening to, nor repeating.

I dont mean to be the odd ball hear, but I hear it alot too, rengaurd isnt perfect, it does help though. But when people say somthing about it that is an MAJOR issue (like hacks bypassing rengaurd), instead of saying, "Thats not true, I never heard that EVER!" you guys should say "thanks for bringing that to our attention, we will look into it" And accually look into it...

I doubt that these cheaters can actually bypass RenGuard! Like people have been saying, they are just scare tactics to encourage cheaters and deter people trying to save the game.

suntarinstead of saying, "Thats not true, I never heard that EVER!" you guys should say "thanks for bringing that to our attention, we will look into it" And accually look into it...
Maybe because we've heard this "cheats are bypassing renguard" but yet there've been no signs of it...don't think that we just ignore it.

I've never seen a hack or cheat in a RenGuard server so far. It's nothing really to worry about right now.

Subject: Is renguard obsloete

View Forum Message <> Reply to Message

Every just says "oh renguard is easy to get around even i know how!!1", but then no one ever does get around it :rolleyes:

4 or 5 people usually say that everytime someone accused is on renguard.

View Forum Message <> Reply to Message

actually, I have heard of this too and I am investigating such claims for the good of the Renegade community, in LAN mode of course.

Please do not think that I would cheat in a server, because cheating is as wrong as having Black and White color on a computer.

Please don't ban me either, though I'm sure some people will jump at a oppurtonity to get me into trouble :'(

ive accually heard you can join the rengaurd server then once you get it, close rengaurd and activate the cheats.

i dunno about that, im sure if they knew what they were doing they would just have it check for the rengade client every 3 mins or so.

Also, how does rengaurd work compaired to Punk Buster?

Im sure some people here have cheated in CS before, remember how you got past the punkbuster anti-cheat.

Supposedly what the hack does is let the person put a objects.ddb in that will bypass RenGuard so that they can play in a serever

I don't see why you can't make one post discussing two things, instead of posting another two minutes after the first. That is called spam, and it's annoying.

View Forum Message <> Reply to Message

Firstly we DO investigate claims. Second the link you provided me is bullshit. I downloaded this so-called cheat. I put the objects.ddb in my data folder. I launched RenGuard and pressed "Renegade". RenGuard found the cheat, refused to launch Renegade.

Try #2, I launched RenGuard, launched Renegade, went to the server list, dropped the objects.ddb into my data folder, RenGuard instantly found it and terminated my Renegade instance. Nothing in the readme suggests any method that lets you use this file while RenGuard is running.

However, the website and the readme all said this would get around rengurd so maybe there's some anti-cheat called "rengurd" that this cheat gets around... but it does NOT get around RenGuard.

Sorry for the false claim Crimson and Company

EDIT: Did you see if it would let you into a RenGuard server? Just want to know, I'm not reliable I guess...

EDIT 2: Maybe (if you want to try, I don't wanna waste ur time) without RenGuard running?

Subject: Is renguard obsloete
Posted by Crimson on Sat, 09 Oct 2004 23:37:11 GMT
View Forum Message <> Reply to Message

RenGuard closed Renegade when it found the cheats. There's no way I could have joined a server.

View Forum Message <> Reply to Message

Quote:It would still close the Renegade instance.

Would you like to ask the audience?

No, we mean it would go INTO A RENGUARD SERVER without RENGUARD and cause HAVOC as it is also a DAMAGE HACK.

No more lifelines.

View Forum Message <> Reply to Message

Okay, Mrs. Bitchy Lady with red hair.

Thing you're forgetting. You can't join a Renguard server without Renguard. Renguard catches the hack so it's not going to happen.

You are the weakest link. Goodbye

:rolleyes: You aren't listening. Here are the facts of what we don't know:

1. It's supposed to bypass RenGurd.
2. It doesn't work with the RenGuard client.

You see, it bypasses renguard. So possibly it will bypass the renguard server part.

I'm just going to shut the **** up before everyone here hates me.

I'm not really sure what you are trying to say. Yes, it is a damage hack, and on a non Renguard server someone could cheat and wreak havoc with it.

But, then you go on to say that it bypasses RenGuard? It does not. It will only work on a non-RenGuard server.

Subject: Is renguard obsloete
Posted by Toolstyle on Mon, 11 Oct 2004 18:53:24 GMT
View Forum Message <> Reply to Message

I know nothing about RenGuard or this hack, but what if the hack was in your Renegade Data file, and it allows you onto a RenGuard protected server WITHOUT RenGuard being on? It might bypass the server's RenGuard.

Subject: Is renguard obsloete
Posted by Crimson on Mon, 11 Oct 2004 23:57:23 GMT
View Forum Message <> Reply to Message

There is nothing that can be put into an objects.ddb file that would fool BRenBot from making sure you are on the network or any other server bot. There is no communication nor correlation between the two files.
