It's about that time when I start playing Renegade once again. However, this time I want to buy a server. I notice a lot of servers have been bought and hosted by businesses, but the question is, if someone is willing to answer:

What server purchase solutions are out there. Which are the best and what do they price at? I think this could be a helpful, good sticky topic (if it gets good answers as well). Anyway, thanks in advance.

I know a bunch of people used to or still use

<http://www.servermatrix.com>

Our clan has switched to another provider though I don't know what it is. Server matrix's prices went up, that is why we moved.

I still don't see how you're expecting people to order when you don't even have an order form. Take some time and get one working in PHP.

order@aohost.co.uk

its perfectly possible

Yeah, but having an order form shows a level of professionalism, and makes it a hell of a lot easier for the customer.
