Posted by [jonwil](#) on Mon, 18 Oct 2004 00:41:51 GMT

[View Forum Message](#) <> [Reply to Message](#)

If you are having any problems installing Core Patch 1 (e.g. always.dbs is disappearing, downloader starts but doesnt download anything etc), I need to know about it so I can find out why and hopefully fix it

You can find me at AIM jonwil2002 MSN JonathanWilson623@hotmail.com ICQ 77572965 or in #bhs_support on n00bstories IRC.

Also, if you get any errors from the CP1 installer (e.g. if the language installer spits out an error), MAKE A NOTE OF IT (a screenshot of the error would be nice but make sure to move any message box out of the way of the CP1 downloader window so I can see what it says underneath)

might not be the place, but I've had this "core patch 1" since months before it came out -- it was posted as bhs.dll with some server side script from black-cell. if people are having problems they can just do what I did and install the bhs.dll to their \renegade folder... i'll post the link later.

never mind, here it is <http://web.black-cell.net/scripts19.zip>

thats not "core patch 1".

Thats just some scripts related stuff.

"core patch 1" is a LOT more than that (maps for example)

jonwilthats not "core patch 1".

Thats just some scripts related stuff.

"core patch 1" is a LOT more than that (maps for example)

renegade works, apart from all the fonts are plain and dodgy :S

also, why didnt renguard download the new CP1? I had the beta, but I had to download the full one on its own

oh i got sorted ages ago ^^

then site said "scripts.dll included in the package is wrong one, dl this one"
so i did, and that made it worse

but alls sorted now ^^

and i got ma old fonts back and loading screen using normal fotns looks fine, even tho mac said tey had to change font cause wit old font it looks shit, lol

[View Forum Message](#) <> [Reply to Message](#)

If you run renguard, you can get it from there. Be sure to enable core updates in RenGuard's options. Its enabled by default.

If you do not run RenGuard, you can get the standalone installer on <http://www.renguard.com>

Subject: smaller download packages plz

[View Forum Message](#) <> [Reply to Message](#)

Please no one laughs but everything is running fine with renguard (thanks for your work!) except when I try to DL the core patch 1 because the package is too big for my modest 64 RNIS connection So, my resquest is simple: would you be kind enough to get separate smaller packages for the guyz like me to get the core patch 1 and the other stuff included? (I think in particular of the maps which I never could DL but, at the same time, make impossible to appreciate your work at its just value :rolleyes:
Greatest thanks in advance!

Since I cannot edit nor supress my precedent post...Well guyz, this morning I was very happy to see following things:
1) As I tried once more to DL the CP1, it had preserved all of the precedent DL so that it was able to make the DL to the end
2) CP1 was successfully installed und now successfully running

CU on Ren servers :twisted:

Posted by [Jackarias](#) on Mon, 14 Feb 2005 14:43:11 GMT
[View Forum Message](#) <> [Reply to Message](#)

i cant get it to work. i just installed ren today. i got rengaurd and checked out a few sites (like <http://www.thekoss.com>) and they say wol is down. i went on europe servers and there was like 3

servers up... i got xwis but that kept just 3 servers, but with a ping of 0 instead of 200+ with wol. (i have broadband). i had my pc wiped 2 days ago.

i came here but rengaurd insists on the 1.0 cp being downloaded. 4 times now, it downloads, gets to installing and gives an error message. it says a file is missing, but it does not specify. it then proceeds to freeze my computer, so i cannot get a screenshot, and theres not much to download as it isn't specific.

i am currently downloading standalone_cp1.zip from the post a few posts above this one.

please help me someone!

[View Forum Message](#) <> [Reply to Message](#)

Hi all, I have dl CP1 for non renguard users and have meet a language problem. I have send a mail to John to explain the problem...but thinking he has a lot of work, he may be cannot answer my question : How to uninstall CP1 ? because now when I connect to WOL I have an empty server list and I can't play !

I think it's because something from CP1 is still running...so if you can help me to uninstall him (a list of files to delete for example...)or if you have any "good" proposition...you're welcome !

Alright I installed the CP1 from the BH Studios Site. I had to uninstall it because my renegade game kept crashing after I installed it. After I unisntalled the CP1, Renegade worked fine for a day then kept crashing again. So i uninstalled Renegade and attempted to reinstall, but now, the font wont show up when installing renegade. It is like a bunch of blank spots where the words normally are. How do I fix this?

First off, it seems to be the almost ubiquitous, albeit harmless, error 17 that the CP1 installer is spitting out. Second, apparently your bandtest.dll is goofed, give me your AIM or MSN and I'll send you a copy of mine.

Posted by [bat66wat6](#) on Sat, 02 Feb 2008 11:07:35 GMT

[View Forum Message](#) <> [Reply to Message](#)

Okay, i apologise if my problem has been sorted already but i kinda skipped a few chapters on this Topic.

My problem is,

I wanted to update my Scripts to the latest version, im fed up of joining servers and there going "Your scripts are okay, but get the latest version from bla bla bla.com".

So i used the Renegade Tool Manager(Usually quite a handy programme) to download the latest scripts.dll. Scripts.dll 3.4.4. But after doing this i got alsorts of errors, such as WWConfig popping up then when i interact with it in any way it crashes and quits the game!

After finally fixing this (via reinstalling) i have to yet again try and find those sneaky little files that make my maps load fast, cool EVA noises such as the Nuke/Ion countdown and icons above head when saying Radio Commands.

I have asked all over, downloading around 5-6 .zip files and none of them have been what i wanted.

Most of you are going, "Oh thats the CP1 & CP2 you want!".

Well, maybe it gives me icons above head but there is still no cool noises and still crap map load speed! Not to mention that crap rubbish font that some idiot threw in! It totaly ruins the game for me.

Please, im really annoyed here. My Renegade works fine, WOL is fine all is good. Except maybe 1 or 2 minor tweaks needed with config. I just want 4 things.

#1:Fast map load

#2:Icons above head when saying Radio Commands

#3:Added audio such as the Nuke/Ion beacon contdowns

#4:NO i repeat under no curcumstances! Any stupid altered font! Especially ingame!

Thank you for reading all this. Please, can anyone help me?

bat66wat6 wrote on Sat, 02 February 2008 12:29 Will that gimme cool sounds, fast map load, icon above head when using Radio Commands?

No that is just a scripts update, to get the sounds and icon etc you need to install Core Patch. I would advise you to unstainll Ren, reinstall it, apply the 1037 patch, install CP1 then CP2 and then update you scripts.

Subject: Re: IMPORTANT If you are having problems installing Core Patch 1

Okay, the only way is to do what all of you are going mad about.

CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1
CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2CP1 CP2

My comp is in such a disaray. Files all over the place from uninstall reinstall download uninstall reinstall.

Okay, i wanna get this over with. Can someone please post a URL or 2 where i can download a reliable easy to install site for the CPs?

Microsoft Windows XP Error! Please help!

I have some sort of System Error fucking me over at the moment! I will be playing on Renegade and then whack, the screen will instantly turn blue with a load of computer language 01010111010 and other code lookin stuff then it restarts the computer, when i log back on it says "Windows has recovered from a serious error". Obviously im like "WTF! Son of a ****!" This is in its error report.

C:\WINDOWS\Minidump\Mini020208-01.dmp

This error only ever happens when i am on Renegade so i guess it must be something to do with

its files!

The top error C:\WINDOWS\Minidump\Mini020208-01.dmp i can locate but the other error C:\DOCUME~1\pau\LOCALS~1\Temp\WER3.tmp.dir00\sysdata.xml i cant. When i search for it my comp cannot find it! At least not on C: drive!

Please help if you can, thanks

[View Forum Message](#) <> [Reply to Message](#)

Easist way to install CP1 and CP2 at the same time.

Please uninstall Ren, reinstall it, apply the 1037 patch.

Now assuming you have done as I have stated you should have a nice clean install to work with.

Download this and extract the two files to ..\Westwood\Renegade\

Now that you've done that download this and extract all the files to ..\Westwood\Renegade\

When everything has been extracted run patcher.exe and it should begin to install CP1 and CP2 at the same time.

When that finishes you can then if you want to, download and install scripts 3.4.4 from here

Should you get any errors do please come and tell us.

well I am old time Renegade, I used to have everything Installed Perfectly but after playing WOW for 4 years I Decided to Return to Renegade.

But this time it's not Perfect

anyways I installed the game, then the full patch, then Renguard and Finally CP1 everything started Great untill i got this??

Failed : 404 Not Found

check network connections, close the programe and try again.

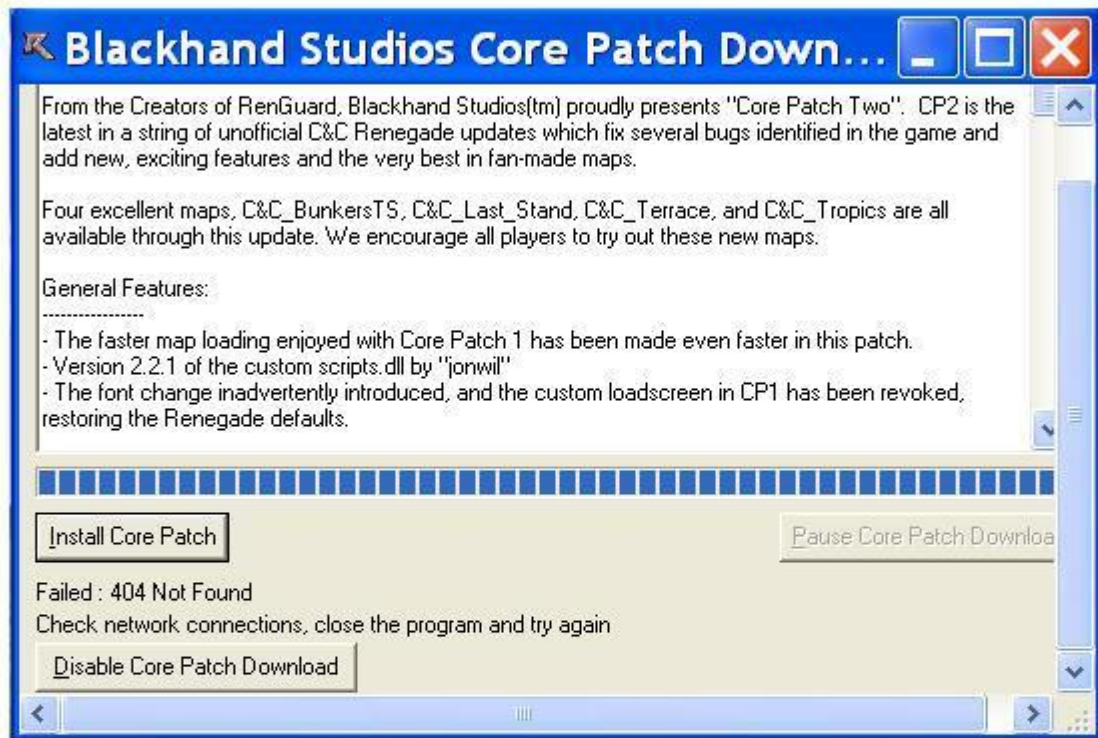

thing is all connections are Great i have given full Allow for Renegade game.exe and game2.exe on my Firewall.

for now I Turned off cp1 in Reguard Options.

I thought Maybe the Firewall Was Preventing CP1 itself except theres nothing to allow or Disallow as of yet so any help would be Great thankyou.

Quote:Failed : 404 Not Found

check network connections, close the programe and try again.

i have the same problem... i tried everything ! really everything but nothing help... i shutdown FireWall... Kasoersky Internet Security... and other...

when i try to start "Renegade" by RenGuard, before when i go to option and press/accept the Disable Pre Core check off...

so i cant start Renegade... i turn back to the RenGuard programm...

and Caveman, do you mean with "Ren" Renegade or RenGuard ? to uninstall and reinstall... ? ^^ dont make it all so secret hehe...

_____EDIT_____

i have done... !!! Caveman, your tutorial form page 2 is good and it works ! i have followed your description and last i have Installed RenGuard... so i made like u ! [1.) Renegade 2.) the last Patch 3.) the patcher + patchall 4.) the script which Caveman mean 5.) and the last one RenGuard :)

PS: i start normal without RenGuard, because u dunno what RenGuard will to by automatically Patch Check

greeting: Renamon
