Hey guys, i wanted to build a plugin, so i used some existing br.net coding for the backend (tweaked a bit).

So if you use Desktop Sidebar (http://www.desktopsidebar.com) and play this game... this might work for you.

http://www.renevo.com/forums/index.php?showtopic=1913

enjoy

This plugin rocks, there should be ALOT more activity in this topic *sigh*

Great job, like always Dante!

if you use desktop sidebar (http://www.desktopsidebar.com), it is a plugin that will show a player (or yours most likely) rank, and wol status (online offline).

essentially, it is stats & wol status in desktop sidebar... which is a really kewl sidebar for your ... you guessed it.... desktop

No.

That picture should explain it.

I need to reinstall Renegade, then I'll use it... One of the damn .dat files fucked up on me... Thats what I get for trying to make a skin O_o

Dante please Email me if this goes open source I want to see how you get that info from WOL etc..

If you own Renegade and you have a brain, then it is already open source.

I don't know how he gets the info from WOL, all I want to know. Because I don't know shit about programming or how he gets the info, doesn't mean that I don't have a brain.
