Mine's still my ss of HL2, so if anybody wants to see it, either go to the n00bstories forums or look further down the list of topics.

That was taken by me, too. I forced DirectX 9.0 to be on.

Why the fuck do you people care what his files are anyways? It's not like it's going to affect you if he has a file named "dick" or "gay". Even if it were porn and Nightma was gay (which we know he isn't) it shouldn't fucking matter. Just grow the fuck up, people.

How come your HL2 icon is transparent and mine isn't? As in, the shadow is just black and it doesn't blend in with the background. I know it's nothing to worry about, but it gets annoying, lol.

Well, there seem to be two different icons. The hl2.ico one is the one with the black background and hl2.exe uses the transparent one.
