Yeah, you'll have a hard time finding a skin for a gun. Most guns don't like being covered in animal skin...

You'd be better off trying to find a weapon texture, because skins are quite a bit different...

It's not an art to know the difference between what is wrong and what is right. Skin is wrong, texture is not.

who gives a shit, if its a skin or a texture lol, just keep it to yourself if you think it means different. You know infact there are many meanings for the word texture, that doesnt mean that we must go saying that is wrong lol.

[n] the musical pattern created by parts being played or sung together; "then another melodic line is added to the texture"

[n] the essential quality of something; "the texture of Neapolitan life"

That which woven; a woven fabric; a web.

Others, apart far in the grassy dale, Or roughening  
waste, their humble texture weave.

The disposition of the several parts of any body in  
connection with each other, or the manner in which the  
constituent parts are united; structure; as, the texture  
of earthy substances or minerals; the texture of a plant  
or a bone; the texture of paper; a loose or compact  
texture

I guess we will have to start stating before hand what we mean in which exact way, because skins are just an overlap of a normal texture itself, where as the texture is refered to something already being done.

Also i would certainly find it odd that even westwood calls them Skins, and every single other company that makes games.

Well everyone except you calls them skins, so i dont know what to say other then you have your own opinions which aren't really right lol.

Except the actual definition of texture is not only what you've written, but also rooted in graphic arts.

Skin has nothing to do with textures. It's an animation modifier.

i said modding is an art, not knowing what a skin and a texture is. My point was that the average person does not know the jargon, help him instead of pointing out the errors in his vocabulary.
