ok i installed ren and everything, i got the patch etc. but whenever i try to join a game or chat room it says "Joining Channel...." and never stops. so i click cancel and try to join another server and it says Unable to join channel...!!! i have tryed almost everything i can think of! i even bought a brand new game and installing it and yet it still wont work!!! wtf do i do?!?!?

IM VERY ANNOYED

Make sure Renegade is whitelisted in your firewall.

To solve the 'unable to join' error, go back to the main menu and log in to WOL again.

Then retry at another server.

Seems to me some ports are blocked or your firewall (windows firewall or hardware router firewall?) are messing up. Did you try playing while connected directly to the net (e.g. with a USB modem instead of a router)?
