I have big problem with CP1. It was working nicely with Renegade, but my CPU crashed with other problems and i formatted my PC (deleted all my C-drive). Now i putted nicely all back, Renegade worked without bonuses, but if i tried to install Renguard, it says all the time "Invalid target". I know that my location was 100% right and even that is not all. I tried to put CP1, it installed nicely and what the heck, Game.exe was gone and Renegade.exe don't work anymore. I can't activate even my best game anymore. I tried restarts and Re-installs and still same problem. Some file language.exe shows text "English detected, LanguAGE id = 0, REMOVING old always.dbs, error2" I putted this always.dbs again (downloaded from blackhand-studios homepage if i remember) but still nothing. Plz help :'(!!!!

Did you update renegade to 1.037 before doing anything else?

what did you download ??? CP Standalone ??
cause 1 of my clan members had also some trouble with his renegade after installing CP of http://www.renguard.com you can better install first normal renguard en let renguard update you renegade to CP

Yes, it was stand-alone pack, that might be a problem, but i can't install even renguard because it says i have wrong directory, but i have right browse, renegade is in normal place, i didn't moved folder's destinacion
