heh, I don't know whether that is sarcastic or not, I use pre-made templates, and only deal with HTML when I am updating my content and such. I can make a SIMPLE template, but other than that I can't do much.

i build web sites for a living for small companys. If you need any help with php or hosting services then give me a pm. I wont make the whole site tho as I am a bit busy at the mo but to get you started heres a simple yet easy PHP counter

Quote:#Script needs countlog.txt with read and write permissions (666 FTP code)

```
<?php
$datei = fopen("countlog.txt","r");
$count = fgets($datei,1000);
fclose($datei);
$count=$count + 1 ; // add one more to the count
echo "<font size='4'>$count have visted this site.</font>" ;
$datei = fopen("countlog.txt","w"); // opens to write and deletes the old count
fwrite($datei, $count);
fclose($datei);
?>
```

You just need to add the rest of the site now or it could look a bit boring :rolleyes: . But I suppose you know alot a of coding n e ways.

Sunwise

If you want a good reliable host which holds all the scripts and databases for cheap then vist this....

<http://www.ansmedia.co.uk/>

My friend runs it and I run all my customers off this service had no problems yet. I pay £20 a year for 1G bandwith, 1G web space and web mail with forwarding + scripts....

- Cpanel 9.9.9.8
  - Apache 1.3.33
  - PHP 4.3.9
  - GD2 Enabled
  - mod\_ssl 2.8.22
  - Unlimited Subdomains
  - SMTP & POP3
  - Neomail, Horde & Squirrelmail option.
  - Webalizer
  - phpBB and PhpMyChat installers
  - Forwarders
  - File Manager
  - Disk Usage Statistics
  - Backup Facilities
  - Password Protected Directories
  - Error Pages
  - MySQL Databases
  - PostGreSQL Databases
  - Front Page Extentions
  - Search Engine Submission
  - CGI Center
  - Cron Jobs
  - Scripts Library
  - Agora Shopping Cart
  - Network Tools
  - MIME Types
  - Apache Handlers
  - Hotlink Protection
  - Index Manager
  - IP Deny Manager
  - SSL Manager
- 
-

£20 for a year of 1gb diskpace and 1gb bandwith....

dear god thats terrible!!!

Thats like 83mb a month of bandwith !!!

That truely is horrible!!!

Seeing as one of my packages is:

1.5GB Disk Space  
5GB Bandwith  
Cpanel 9  
unlimited mySQL database's  
unlimited FTP accounts  
unlimited POP3 accounts  
etc, etc

For just £5 a month!

And seeing as i have multiple servers, i can make up custom packages and also design packages to suit budgets.

Madtonelf you want secure, reliable and professional design/hosting.

<http://www.freeflow-solutions.com> is the answer

PM for any pricing or examples needed. I have satisfied clients who can provide testimonials on request.

I can provide a not so satisfied testimonial. We had you code a tutorial script for Digital Depiction and we get it with an ugly "FREEFLOW SOLUTIONS" banner splashed across the bottom that you don't want us to remove.

[View Forum Message](#) <> [Reply to Message](#)

---

Ty, I can't say that I'm not happy with the work that he did, but like you said, that banner is quite the annoyance. He never said that I can't remove it, but he does request that it stays there.

Also, Apocalyptic Media will gladly build a web site for you. We guarantee you that we will beat FreeFlow's price on web design/coding.

If you want web design, come to Apocalyptic Media, but if you want anything else that has to do with coding then FreeFlow is what you want.

I can provide a not so satisfied testimonial. We had you code a tutorial script for Digital Depiction and we get it with an ugly "FREEFLOW SOLUTIONS" banner splashed across the bottom that you don't want us to remove.

Like i told Incognito, we can customize that image to fit any skin that you make for it. It IS just a request to keep that but if need be, you can remove. Its just a friendly gesture to leave the code where it is.

I know your not a fan of people leaving their signature on their work, for example removing forum copyrights.

Its basicly a favour leaving the copyrights there, but if you really feel like removing them, go ahead.

I know your not a fan of people leaving their signature on their work, for example removing forum copyrights.

I hope that wasn't meant to be derogatory. The copyright was removed accidently on our forums due to some template modifications and was promptly replaced when it was brought to our attention.
