Here's a Renegade film some others and I made. It's not anything amazing, but I like it. A big thanks to those that helped me film.

http://hulkcore.tripod.com/

click the video link...stupid tripod won't let me link to the file....
and please excuse the horrible site.

Heh, that was pretty good. Although I suggest not letting people talk when you're recording, and make sure you spell things correctly.

Oh man, you gotta have sound, that's the whole expeience. The soundtrack pretty much narrates the film. So do yourself a favor and get some headphones or something.

I also wonder, Winamp 5.08 should play .wma files also.
Now I imported the link into the Mediaplayer and it works now.

Yes, very much so. Never seen anything like it, you sure it was thought up in 10 minutes? It was a
very good movie.

I've been having some problems with Winamp playing wmv files. Sometimes they freeze, and quit
working. Also, on ones that do work, I can't skip ahead or go back without it crashing.

I said the text was thought up in 10 minutes, I kinda just did it as I edited. The whole thing took like 5-6 hours, 3-4 hours shooting, 1 editing.

there's a free demo of fraps at www.fraps.com which is decent, but the full version is much better.
I just wish I had a better comp so it didn't get laggy.
