Does anyone know a program I could use to re-create people? Like computer generated like? It would be helpful in making a banner for The Tale.

You'll have to get gmax or something like 3dsmax, maya, etc. and learn how to model... Or buy a character model off of a model site, or pay someone to make one for you.

Glyde, I'm going to be straight with you.

You won't be able to learn the ins and outs of such a program for quite a while, if ever.

Yea, this stuff is not an easy thing to do. You really need to know and have a feel for whatever programs you are going to be using. Modeling something to a really realistic level takes a lot of practice.

ya 3d modeling is tuff..

i had maya.. learned enough.. but i gave it up quick lol
