You can use any reticle you want with RenGuard. You just won't be able to join a "pure" server. However, "pure mode" is intended for use in tournaments and competitions so there aren't really any servers that run it.

umm is your ingame name the same name that renguard sais when you login? or it could of been a problem with the bot that they use. Also you can go to http://renguard.com/locator.php and type your name to see if you are loged in or not.
