Like I need just basic help with mods...I heard that you extract them to your data folder..... but how do you remove them? Or do you have a choice have a choice of which mod to use before the game? Like normal Renegade or say Ren Alert. And how do you remove Mods? Do they appear on the Add/Remove list or do you have to do it manually? Can you turn them on or off? Sorry if there are stupid questions/

Renegade Alert is installed to it's own folder, it doesn't affect Renegade.

If the mod came with an uninstaller, you can use that, or you can try deleting the files that the mod installed...

Uh, no.

Quote:Renegade Alert is installed to it's own folder

Default is something like Westwood\RenAlert\

You can get the mod and the patches seperately, or get it all together by downloading the full version.
