Hi All,

I'm getting tired right now. Kicked out, because NOT using RenGuard.

Installed---> Renegade--->Patch 1.037--->RG --->CP1

If it's just the sequence, don't mind to help.... won't hurt1

EDIT: Or it is the Registry.........

Do you have any firewall software?
can you cut and paste the message in the RG window both when you connect and/or when you are kicked?

Thanks to you.

Will connect you tomorrow.....(I'm getting kicked out by every tiny server...)

RG worked all the time, so no offense......

Cheers,

 noodles

When I start the game, RG starts shortly after and welcomes me.
Even in the game the "RG" soundappears.

It takes about half a minute till I get thrwon out with the server message:
you are kicked by not using RG, download it from:....

I isnstalled Renegade and all components like 4 times that night.

Any idea, how I could fix..?

Öhhh, no I'm just getting kicked out.
Yesterday a server told me "Your RG in not working properly" at lest an effort to "you are getting kicked".
This issue is so strange and ugly.
