I can't play Renegade on my new high speed internet at Westwood.

I have no trouble getting into Game Spy to play, but everytime I select westwood online, I get into game listings, select a game, hit start. Then I see the normal game loading screens (testing connection,

Objective screen, Message of the day).

Then I see a neutral colored background with Team scores in the right places and a full game time at the bottom but flashing "Gameplay pending."

Then I see a message box that says "Connection to Server Broken - Please Quit".

Do I need some other type of patch or update other than the autoupdate, or is my game version incompatible, or, or, or ???

Any suggestions?

Ok, start Renny and click Multiplayer Internet. Next click Westwood Online. In the next menu look on the left side bar and go to the My Information link. Go down to the Connection space and click Retest.

What i think is that Renegade doesnt yet know you have high speed. Once you retest it will test and change your connection speed.

"In the next menu look on the left side bar and go to the My Information link. Go down to the Connection space and click Retest"

I would just put it on LAN/T1 that will fix it. Then your connection will use all available bandwidth.

it was updated to lan/t1/t3

and it also reduces lag!!!

I know i'm late, but i have this same problem and it just occured very suddenly (and randomly), i haven't installed or downloaded anything to renegade recently that would have done this and your redoing connection speed or switching to t1 doesn't work.....any other suggestions?
