I don't understand what is going on. I use renguard everytime I play renegade. I am logged into renguard everytime I log into renegade yet I am banned from every server that does not have renguard running. I have been playing this game since it came out. I stopped around a year ago to play BFV and now im back waiting for BF2.

Someone please help, is there anyway It can be proved I was logged into renguard the time I was banned? This is getting very aggrevating, I provide screen shots, shoot the wall, and whatever else admin want just because I get a few head shots. I mean geeze I don't even use skins, I play as the game was meant with no mods yet I am getting banned. Can someone please help. I want to play renegade.

It's those stuck up admins in those worthless servers... Try joining popular servers like n00bstories instead of PistolServ.

jelly-games has a new sniper server, jellygames is always a good place to go if you don't want a retarded moderator spoiling your day, plus crimson79 sniper server

N00bstories had very bad moderators when it was hosting servers for renalert. I don't know how that's going now though.

But it wen't like... Kill them and get (q)kicked a second after it for "cheating". So i have seen enough n00bstories for one life time...

I no longer host RenAlert servers and I have a wonderful staff on the two servers that are currently online.
