This could be real good, or real bad. It just depends on how you look at it.  
I like flash the way it is!

Yeah its good, but imagine it with filters, and burn tools etc.

Hmmm. I never thought about that. It's a bitch having to go threw hundreds of websites to find the right actionscript set up. It would be nice to have all those filters and tools on site without having to impliment them with code.

Hmmm...

Great news.

I don't see any reason to be opposed to it.

The only thing I'm worried about is also flash. If they fuck it up its gonna cause a LOT of grief.

I wouldn't mind a better version of fireworks though. One with their tools in it

Wow I honestly can I say I never saw this coming.

I see one down side of this, the two companies worked better apart because it bred competition between the two, evne though they marketed slightly different applications and content creation systems.

Though if they continue the way the did before and only the name changes or such, I will also continue to be happy.

Can't wait to see what the future beholds in this.

Great find

I don't see how a company like Adobe could "fuck up Flash".

It's probably going to have the same fate as Flash... Just be developed as normal I guess.
