Jeep RubiI cant get BlazeRegulator or NightRegulator to work plz help!!

http://www.multiplayerclan.net/brenbotguide.html

That link should help you get brenbot working, it is an excellent tutorial made by Zunnie from
www.mpclan.net

Wow...This thread makes me laugh at how brutal it is.

There is no installation of BRenBot, unzip, config and it works.

The tutorial is very comprehensive and should get you through almost all of the hard stuff.

Jeep RubiOk i got night regulator installed but when i start it up is says your FDS directory is
wrong and to correct it but i dont know what an FDS directory is please help me!!

If you don't know what an FDS dirrectory is you probably shouldn't be trying to run a server.

At BRenBot.com there are only patches and no full versions.

i finally found out what an FDS is and its a free dedicated server but i need a FDS serial number
because all the ones at westwood are taken.

does any one have an old one they are not using that i could have or is there any were else that i
could get them?
