Have you tried reinstalling everything?

He asked 'everything', not just Renegade.

That's quite an odd error message.

Are you sure you've followed the install instructions, very closely?

1) Install C&C Renegade
2) Install the C&C Renegade 1.037 patch
3) Install BHS's RenGuard 1.03
4) Optionally install BHS's CorePatch 1

If you read the FAQ, you'll see that you get that error if you have Renegade installed somewhere other than the C: drive.

Go here in the registry

HKEY_LOCAL_MACHINE\SOFTWARE\Westwood\Renegade

and check what the Install path is.

Mine is currently, C:\Westwood\Renegade\Renegade.exe

Yeah i have uninstalled all first the RenGuard then Renegade Deleted the file all the saved games cleared the Registry reinstalled Renegade in C:\Westwood\Renegade installed the update C&C Renegade 1.037 patch then istalled REnguard and still get the same message i did not install the BHS's CorePatch 1 tho but i dont think that has anything to do with it could it be Microsoft Antispyware when i first intalled Rengade and went to WOLData Registration Entries the antispyware jumped up and i stoped it from going thru and now i can't put that in the registry? WOW that is a long reply sorry
