K for some reason everytime I host a game on renegade only when i host it kicks me offline whenever i decide to shutdown my server or when it switches map. Everytime i join a server and leave or skips to next map its fine. I don't know if it my isp, firewall etc. So if there is anyone that can help or lead me to another forum more to isps that would be great. Thanks

---

If you have a router, it could be it.

What's your ISP and how fast is your cable/DSL?

My Isp is SBC Yahoo DSL pro pAckagae 3megs down 512k up
At the moment, I'm not using my router cuz my computer is the main havent had the time to set it up for my dad to have dsl so it cant be that as of right now. I just got this ISP like 2 weeks ago but it so gay how it does that to me.
