First of all, don´t laugh about this plz.

I know the most of the users on this Forum speak english. But there are some germans registered in here who run servers and not all german Renegade gamers know the german Forum on www.cncforen.de ... but some of them are signed in here on this Forum. That is why I made this topic.

So I thought of translating the configuration files of FDS and BR into german. I have translated all important files except the server2.ini which i´m currently working on.

I will post the complete server2.ini in this Topic when it´s finished. I´m looking forward to fill in all fanmap coordinates available updated by Zunnie.

```
File Attachments
1) Deutsch.zip, downloaded 295 times
```

Its finished !

The complete ZIP is in the post above, including the server2.ini with the latest coordinates taken by the post from zunnie on mp-forum.

Nice work. Anyhow, use ' (shift+#) instead of ´.
