I have windows 2000 on 2 machines and xp on 4 and both the win 2000 are comming up with buffer overruns with rengaard. Does any one have a fix/patch untill BHS comes up with a newer version to fix the problem?

Do a search, there was one thread with a workaround.

I have searched for over 2 hours and can find no workable thread. If you have a link that would be helpfull.
