my Rene Fds is working and everything now and i can run a server but when i activate NR i just sits there and none of the commands work. do i need to put some from the NR directory to Somewhere in the FDS directory? if i do can i know what it i, ive been tryin to set this server up for at least a week. if you help me just tell me if u wanna be a mod.

Thanks to anyone who helps or even trys to help or has helped
