---

I've got Windows XP Pro SP2, and when I try and install the core patch from renguard ( just downloaded a few moments ago) it says the exact following.

"The Applicatoin or DLL C:\WestWood\Renegade\Patchw32.dll is not a valid Windows Image, Please Check this against your insallation diskette. "

Can someone please help me with this, is there something else I should have downloaded..

---

Delete the dll, and re-run the core patch downloader
