I have recently instailled the gsa fds instailler, and have set up Brenbot. I am now unable to run the fds, and play renegade at the same time

people tell me thats normal, but they can't come up with a solution. My game.exe and renegade.exe are shown under my taskmanager's processes, but I can't play them

what im basically trying to do, is play on my gsa fds server

any suggestions?

ohh idea
make a new account in windows then switch users and run ren in the other windows account dont log off switch users

BYE

PS works right

It's an old idea, but a good one. It does work nicely.

Um........I don't have the "Switch User" command, I'm running Win2k

anyone know any other solutions?

trooprm02 wrote on Wed, 26 October 2005 19:40Um........I don't have the "Switch User"
command, I'm running Win2k I know that for my XP installation to have it, I had to enable it in my
User Accounts control panel.

Control Panels -> User Accounts -> Pick a task ... Change the way users log on or off -> Check

---

"Use Fast User Switching"

Whenever I run my server and want to play, I run Renegade first, then run the FDS second, but
once I close ren, thats it until I shutdown the FDS.
