If you have problems woth renguard liek my other pc does like eehm

*disconnects when you start game
*doesnt go further then initializing blabla (not ingame)
*if u start online and u have corrupt game.exe (after you joined a server ingame)

*Start renegade from desktop.
*Just keep trying till u get your nickname online
*if your nickname splashes into renguard main screen
*JUST W8 for 10minuts
*just go internet or something..

YOU HAVE TO W8 10MINUTS!

*After the 10 minuts start renegade.
*try to dont click abort by connecting
*join one server.

stay in the server because if you leave renguard prob will not work further until u restarted rg.

This works on my cpu!

What do you mean?

He is absolutely right. If you are having trouble with RenGuard saying "bad game.exe" and you
are confident that your game.exe isn't bad, then:
#1) Turn off auto-launching Renegade

#2) Relaunch RenGuard
#3) Wait a few minutes
#4) Start Renegade manually

The way he typed it let it be hard to see what he wants to mean with it and where doing his steps
are for.
