Yeah well, n00bstories AOW is on GSA right now, so I go on the GSA website and download it. Install and go.

after the installation, i put in my Email, my password, select Zonekill9 profile , click the button and hop.

PAF ! Error, please reinstall. Whewt.

I return to the website, REdownload, REinstall, REtry.

PAF ! Error, please reinstall.

I rreturn to the website, REREdownload, REREinstall, RERERtry.

It works for any name other than the one you wish to use?

Just making sure I understand you correctly.

Best advice, use irc to direct connect to n00bstories server. That's what I do, coz I hate gayspy.....If you wish to do this I can provide you with the necessary command/script depending on your irc level and laziness.
