Gamespy or WOL (xwis)? A screenshot would be nice. And a screenshot of your FDS, not of IRC.

XWIS displays invalid nicks/pws/serials in the motd, but the FDS does not display the xwis motd, so the FDS thinks the login was successfull, but thats not true.

Serial doesn't matter. The problem is an invalid password, which means the nick is already taken or you entered the password wrong. Pick a new nick and you'll be fine.
