I played this game for 3 years and I have never seen anything like this.

Has this ever happened to you? (I was on noobstories server when this happened). The server must have been lagging a bit because I don't think you can do this by any chance.

Haven't seen it myself, but considering some of the stuff lag can do the the physics in the game, it doesn't surprise me.

Would'nt most of that stuff be things that host did to the maps he was hosting. Maybe he changed the top of the turret model to an apc.

In one of my maps i changed the orca model to the A10. I used it in m03 and hosted it, after i got like 8 people into my game i changed myself to neutral(Spawns me where i placed my orcas(Look like a10's))got into an apache and jumped out of it, landed intop of the a10(Only way to get into it) Flew it to the battle seen and shot people down. I also changed the a10's health to like 2000.LOL!! But its kinda hard to kill people when inside the A10 using orca weapons.

I think I can honestly say that I'd rather get stuck on top of a turret than fall into Blue Hell.

Negative. That happened while I was playing, and it was not like that before. The APC was running from Medium Tank, and it ended up there
