Im having some problems with RG (posted in renguard support section) But i thougt it would just be easier to uninstall renegade and reinstall it. Problem is i have AOL 56k modem
And it takes me 4 1/2 hours to download CP1... so is there a way to take it out of renegade before i uninstall it?

I'm afraid not, the only hope would be that you didn't delete the install file. oOher wise I am afraid that you will have to re download it. I'm surprised you can even play Ren on 56k.
