When I installed Brenbot, and I have slave servers, when I start up FDS it says "Invalid affinity" so it won't start the slave server! Now I can only start one server that's the master server. Help please because I need my AOW server back up! Thanks in advance.

Brenbot does not work with slave servers.  
Run 2 master servers instead.

So does that mean in 2 different Dir's and irc channels?
