When it happens, check in the upper right for the button "Printscreen" and press that button, then open up Paint and press Ctrl+V. Now the screenshot appears and now you will have to save it to JPG. When you have done that upload it, under the message body (the thing where you type all the text in when you want to psot something) is a button that makes you able to upload it.

Do this and when it's uploaded, check their again and there schould be a button that makes you able to put the uploaded file in the text.

Yes, these were the ss's we wanted. now the problem is... it could be about anything .

Do you have a decent virus scanner and anti-spyware program? It might be due to a virus/spyware or it could be a totally different problem. Try www.spybot.info to start with.

If that doesn't work, did you try reinstalling renegade and see if it is any better?

Did you put in the newest scripts.dll and bhs.dll?

Subject: Re: i got a prob with game2.exe

[View Forum Message](#) <> [Reply to Message](#)

I don't think it's an error with newer scripts.dll.

Hmm, I haven't seen that kind of error much, I propose you do these steps:

- 1.Un-install RenGuard. (Do this through Add/Remove Software)
 - 2.Delete any Game.exe s or Game2.exe s in your C:/westwood/Renegade folder.
 - 3.Install this No-CD crack. (Simple put the Game.exe in your C:/westwood/Renegade folder.)
 - 4.Re-install RenGuard. (www.RenGuard.com)
-

moleap wrote on Sun, 08 January 2006 16:58no what are they?
They're DLL files, Renegade uses them. JonWil reversed engineered the orginal scripts.dll and added very much lines of code to add what you can see as "extras" and "addons", for example there are some crash bugs fixed and all maps load way faster, emoticons above the players head when he uses a radio command and you can hear and see the Obelisk charge-up.

BTW, do you mind trying what I suggested?
