Ok first off, introductions

I'm CFEhunter, i've been active in the community for years but havnt been on the main renegade forums before today.

The mod is for ren, it's an RA2 TC mod (exclueing yuri due to engine issues)
For those of you who may have already guessed it, yes this is the old untold team, with a little extra help, however we scrapped untold due to community reaction.

Back to the point...

Site can be found at (link fixed) <http://apocriseing.byethost6.com>
the site has just started so the forums are a little empty, please take a look people

Team and needs,
Firstly we have alot of very nicely done models and some sounds.

However we have no experienced skimmers and we desperatly need an unwrap artist

thanks for reading.

I'm not sure if I linked this to you yet but here is an excellent UVW mapping tutorial.

http://waylon-art.com/uvw_tutorial/uvwutut_01.html

Anyone can learn to UVW map by that tutorial, it gives all the needed information. You might find some conflict if you are usng version eight of 3D Studios max though.

I'm avaiable on MSN to answer some questions.

What models do you have so far? I *might* help out with the 3D modeling if you need help.

My former Renegade Revived team (dead Ren mod based on a Renegade 2)has given C&C
Apoc Rising all of the stuff. That includes a Weapons Factory, Helipad, Barracks, Flak Cannon,
Pistol, MiG, and a few other goodies.

Copy and paste the link-- it doesn't go to the web adress shown.

Or, just click.

I had a look through my old backups and found some old Vengeance models I have that I don't
think other people have given to you.

What we've got is a character model which I think was to be made as a Soviet Officer model from
a guy named ScreaminBubba, and then a Nighthawk chopper made by ScreamingCricket from
like early 2005.

I whipped up a couple of quick renders taken from max. If you're interested, let me know and I'll
hook you up with the files.
