You mean Brenbot commands. Typer !help or !commands when you enter a server to get a nice little list.

The most important:

!nextmap -> shows the next map
!rotation -> all maps in the rotation
!showmods -> shows the moderators online
!minelimit -> shows the mine limit

Typing !help would sometimes give you "You want help you go see a doctor. Type !commands for a list of commands"
lol

You could also use
!vote yes
!vote no
when someone is doing a poll(End this map, kick this guy. etc...)
